WORK EXPERIENCE

Sr. Database Developer

2014 - Current

Novantas, New York, NY

- Database owner of bank deposits analytics dashboard with 20+ clients and more than \$1B in total assets under analysis
- Helped triple client base and assisted international expansion by maintaining master version SVN code repository and synchronizing shared code across all clients and environments
- Coordinated database deployments of bi-monthly UI releases across five timezones and multiple servers
- Developed new features, enhancements, utilities, and bug fixes
 - Improved accuracy of tracking CD renewal balances
 - Reviewed and merged all bug fixes
 - Collaborated with UI, product management, and client services teams
 - Implemented automated testing to reduce bugs

Application Developer

2011 - 2013

JPMorgan Chase, New York, NY

- Lead developer of technology cost savings initiative that was promoted globally and led to \$3 million in savings for Asset Management in 2012
 - Brought transparency to recurring and erroneous technology charges via monthly billing to all Asset Management end users
 - Cleaned, loaded and standardized data from numerous billing sources
 - Automated charge inquiry and removal processes
 - Onboarded four other LOB's onto the Asset Management initiative
- Lead developer of suite of email-based automation tools used firm-wide – 15,800 distinct users and 116,000 transactions processed in 2012.
Use cases included:
 - On-demand document watermarking and pre-watermarked templates with associated violation tracking
 - Distribution of the monthly internal newsletter
 - Querying a database and receiving pre-formatted output
 - Automated alerts and escalations based on responses
- Owned Informatica ETL process and Oracle PL/SQL algorithm that allocated server-level costs to individual applications based on usage

Data Analyst Co-op

2010

Logistics Management Institute, McLean, VA

- Contributed to data scrubbing, data consolidation, and preliminary analysis for Section 322 (The Study of Future DoD Depot Capabilities) of the 2009 National Defense Authorization Act
- Developed a new Work Breakdown Structure that captured 95%+ of all available cost data in an Army corrosion study
